

305

Mid Tower

Uncompromised Sense of Beauty

The In Win 305 defies the stereotypical "box" design, and enhances the PC building experience. Fusing together a variety of elemental materials to achieve innovation, also constructed with high quality 1.2mm SECC. Question the status quo, challenge the norm and become the standard!

Exquisitely Modest Aesthetic Design

The 305 black features solid materials such as crystal-like tempered glass and sleek anodized aluminium. The smooth enclosure is eloquently and skillfully crafted to create a simple and yet captivating design. The brushed textures and visual aesthetics of the 305 black will continue to make In Win "Contemporary and Innovative."

'Knock on Wood'

Furnish your battlestation with exquisitely crafted fine-grain timber! The 305 white demonstrates the elegance of the elements by blending styles of materials. The clean chassis exterior is complemented with a laser engraved logo. The 305 presents a new modern design to the PC building community.

Accelerated Tool-less Design

In Win has set a standard for being an innovative computer hardware company. Mission accomplished with the 305 since it has perfected a tool-less design by being able to remove the beautiful 3mm tempered glass side panel by just pressing the handle.

Versatile Cooling Options

Overall, the 305 can accommodate two radiators (top and rear) and three fans at the bottom providing users with a well-cooled rig. The cool air intakes from the bottom creates efficient air flow for quick heat dissipation.
